

I would have been too embarrassed to show this "Proposed" rule to anyone. But then I am a real American, and none of the features of this rule would have occurred to me in the first place. I am so mad I can barely think. I don't know why this has come to pass, beyond the current state of the collapsed educational system in America today.

How else can we explain a river of blatantly unconstitutional announcements pouring out of Washington since 9-11-01. I say announcements because there is no evidence that anyone got to vote on any of it. Our abandonment of all constitutional guidelines is complete.

So now the unknown faceless ones at Transportation Security send a note to FAA and poof, a lifetime of work is gone for me. My license is gone and I appeal to the unknowns who made this decision without allowing me to face my accusers or review any evidence against me.

Well then, that about covers all of my rights as an American going right down the drain. I cannot believe that large numbers of FAA employees have not resigned in protest. I cannot believe that the administrator has not resigned in protest. Where is the House Un-American Activities Committee when you need it?

This entire writing is unconstitutional on its face. How can you enforce any of this and still face yourself in the mirror? If this was not written by communists, it should have been. What a shame it is that Gus Hall is not alive to see this. "We won" he would say. Not one word of this should have seen the light of day. All of the people responsible should be tried for treason.
